This application is up for consideration.

A. In view of the complexity of the claims as set up, this Office action is made.

B.1. Claims 1-41 are generic to a plurality of disclosed patentably distinct species comprising many possible algaecidal agents in the art. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for an initiation of a search, even though this requirement is traversed.

2. Claims 1-41 are generic to a plurality of disclosed patentably distinct species comprising many possible exterior panels in the art. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for an initiation of a search, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

C. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20, drawn to an exterior panel, classified in class 422, subclass 310.
- II. Claims 21-26, drawn to a method of applying an algaecidal agent, classified in class 106, subclass 1.05.

III. Claims 27-36, drawn to a method of preventing an algaecidal growth, classified in class 422, subclass 28.

IV. Claims 37-41, drawn to a method of making an algaecidal shingle, classified in class 83, subclass 25.

The inventions of Group II, Group III and Group IV are all related to the processes but have the patentably different and distinct embodiments and have acquired the separate status and searches in the art and can be supported the separate patents as divided by applicants and have no evidence of the record that they are not required the separate consideration and search since they are the obvious variants because the prior art being applied to one of them would be sufficient against all inventions, restriction for examination purposes as indicated is proper. Applicant should show or provide an evidence to the contrary. In the absence of convincing evidence, the restriction would not be removed.

The material claimed invention of Group I and the method claimed invention of Groups (II, III and IV) have the patentably different and distinct embodiments and have acquired the separate status and searches in the art and can be supported the separate patents as divided by applicants and have no evidence of the record that they are not required the separate consideration and search since they are the obvious variants because the prior art being applied to one of them would be sufficient against all inventions, restriction for examination purposes as indicated is proper. Applicant should show or provide an evidence to the contrary. In the absence of convincing evidence, the restriction would not be removed.

Because these inventions are distinct for the reasons given above and have

Art Unit: 1752

acquired the separate status and searches in the art and can be supported the separate patents as divided by applicants and have no evidence of the record that are not required the separate consideration and search since they are the obvious variants because the prior art being applied to one of them would be sufficient against all inventions, restriction for examination purposes as indicated is proper. Applicant should show or provide an evidence to the contrary. In the absence of convincing evidence, the restriction would not be removed.

D. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

E. Other issues have not been considered until a proper election is made and resolved.

F. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoa V. Le whose telephone number is 703-308-2295. The examiner can normally be reached on 6:30AM-5:00PM, M-TH.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Janet Baxter can be reached on 703-308-2303. The fax phone numbers of the examiner is 703-746-7172. Since there is a newly electronic filing procedure for all initial communicating papers and all responses to an Office action, the examiner fax phone number is

Art Unit: 1752

not for use to receive any fax in response to an Office action. Applicant is requested and required to send all initial communicating papers and all response to Office action to a central paper or fax receiving center for an electronic scanning procedure.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0661.
